Art Unit: 1764

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3-7 and 11-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support for the now claimed limitation that the emulsion system "being at least 76% phenol based."

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-7, 11-17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 3-7 and 11-17 are rendered indefinite by the recitation "said emulsification system being at least 76% phenol based", i.e., it is unclear on what basis the "at least 76%" is measured. Additionally, the claims are rendered indefinite in that the specifically claimed component amounts "don't add up". For example, claim 1 requires at least 50% by weight hydrocarbon petroleum distillate (component b) and 2% by weight antifreeze (component c). Even completely ignoring component d, the maximum amount by weight of purified water (component a) then would be 48% by weight. Claim 1 cannot therefor contain 50% by weight

Art Unit: 1764

purified water as the claim recites. For similar reasons, claim 1 also cannot contain 76% by weight hydrocarbon petroleum distillate.

Claim 20 improperly depends from canceled claim 18.

Applicant's arguments filed March 10, 2005 have been fully considered but they are not persuasive.

Applicants argue that support for "said emulsification system being at least 76% phenol based" is found on page 6, line 27 to page 7 line 15.

The specification at page 6, line 27 to page 7, line 15 does not teach the now claimed limitation or disclose the amounts applicants argue are used to calculate the claimed limitation.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
